Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

Claims 1-7 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, In. 3, the "spots shown by the dice" lack a proper antecedent. In. 4, "the dice" lack a proper antecedent. While dice are functionally recited in In. 2, they are not positively recited as being a necessary part of the claimed invention. On In. 11, "the given spots" lack a proper antecedent. Ln. 13, "the rolling means" is inconsistent and lacking a proper antecedent. Should consistently recite a "dice rolling means". In claim 2, "can be" is indefinite. In claim 3, "substantially exactly" is contradictory and indefinite.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-7 are rejected under 35 U.S.C. 103(a) as being unpatentable over 08-084855 in view of 4-352980.

As to claims 1 and 3-5, '855 shows (1) a CCD camera used to photograph a dice agitator and dice when they come to rest with a certain number of dots showing on the top of the dice, and (2) a dice game machine in which a certain amount of winnings is granted to the player who, based on the image provided by the CCD camera, places a bet on the winning total. While his dice agitator does not show a

rolling surface inclined toward the center, '980 teaches a dice rolling instrument in which dice is first rolled on a rolling surface inclined downward from the outer circumferential direction toward the center. To have used the agitator of '980 in place of the one shown by '855 would have been an obvious matter of choice in substituting one known device for that of another. As to claims 2 and 6, 16 is considered a shielding member. As to claim 7, a CCD camera equipped with a wide-angle lens is well known.
